PROFESSIONAL SUMMARY

An aspiring and highly motivated fullstack developer with a strong passion for learning and building websites that provide great user experience.

SKILLS

Proficient: HTML5 , CSS3, JavaScript ,React(+hooks),Core Java ,OOPS
Familiar: Redux ,Linux(basic) ,SQL(basic),Git & Github

PROJECTS

Basic Todo App   **Github | Live**

- Developed a basic ToDo App using **HTML** and JavaScript **DOM** manipulation

- Designed user-friendly interface for easy task addition, deletion, and modification

- Prioritized simplicity in design for hassle-free interaction using **Bootstrap CSS**

- Ensured effectiveness through the harmonious use of **HTML** and **JavaScript**

Simple Social Media App   **Github | Live**

- Built a simple social media **SPA** application using **React.**

- Implemented page links using a package **react-router-dom** for seamless transitions between User Profile and Home page .

- Basic styling and Ui done with the **MUI**:React component library

- Used **AXIOS** package for making a request to Dummyapi.io (REST Api)

- Since it's a simple app only one feature of uploading post(PUT Request) is implemented.

Library (Book ordering) App   **Github | Live**

- Proficiently coded a responsive App for Library (Book ordering application) using **React**

- Designed an intuitive Flexbox layout for a clean and organized structure and optimal cross-device viewing

- Implemented **react-router-dom** for fast loading and without refresh from home page , book detail page , cart page

- Added **Shimmer Ui** to show the loading state of the book.

- In book page , feature like sorting price high to low , low to high and based on rating has been implemented

- Dynamic cart feature is implemented and state is managed using **Hooks**
